Col. Durr has again made a step for ward as a public benefactor. It had come to his cars recently, that some of the ladies of Tucson were complaining about the beer sold in this city being bitter. Being on confidential terms with his grandmother, a famous old lady who has spent her life in studying the likes and dislikes of her sex, he wrote her, explaining what was the matter with the ladies of Tucson. The grandmother knew at once the remedy, and straightway sent a car-load of the celebrated Extra Pale Erlanger Standard Beer This beer arrived yesterday, and has been sampled by the best judges in this city, and pronounced the best family beer in the West. It is just the thing for the ladies, and no bitter taste is carried with it. The Colonel asks that every family try a few bottles of this beer, and feels confident that they will have no other afterwards. The grandmother has never made a mistake about the wants and needs of Tucson, and will answer for the satisfaction given by this new beer with her reputation, which is good. The Colonel has been instructed to sell this beer at \$12 per bbl. and \$2.20 per loz, so that all may share in the luxury and benefits afforded by its use.

Because a 12 foot wheel will do more work than any other 16 foot "wooden" wheel made, which shows an increase of power of 331; per cent.

Because it is more enduring than wood. The AERMOTOR will not shrink, rattle, rot, nor warp, and the Arizona sun, wind, or rain, will have no effect on it.

Because it is perfectly noiseless. You

n set your cot right under the mill and go to sleep without hearing or knowing that the mill is pumping 2000 gallons of water an hour. Did you ever hear the din and clatter of other mills? Because it is self-regulating; the vane will not allow the wheel to go over a cer-tain speed when it turns the wheel lightly out of the wind, and the wheel lees not stop like other mills, but quick y recovers when the wind goes down. Because you can bring the wheel own to the ground for oiling in less han a minute, therefore no one will be exposed to severe cold, or intense heat. Nor will anyone break his neck by climbing to the top of the tower. For the above reasons, parties desiring to purchase wind-mills will do well to see nem work, as several mills will be put p near Tucson, Clifton, Casa Grande, Forence and Maricopa. For the above
